Hydrotherapy is the therapeutic effects you experience when you are immersed in hot water. The heat that is transferred from the warm water to your body combines with the buoyant effect of the water to trigger physiological changes in the body. But, when you immerse yourself in a normal bath, the body's natural reaction counteracts with the therapeutic value that warm water can induce and the majority of the therapeutic effects of hydrotherapy are lost.

The fine layer of air that surrounds the body when you first immerse yourself in water quickly cools to body temperature and prevents the transfer of heat. Your pores close, preventing perspiration, and the increase in blood flow simply leads to an overall increase in body temperature.

A whirlpool jet (water pumped at force directly onto the body) eradicates this effect. Heat is immediately transferred to the body. The constant agitation of the warm water against the skin encourages blood vessels and capillaries to open, sending a higher volume of oxygen-rich blood to the extremities, while the heat transfer has a sedative effect on the nerve endings, reducing pain and discomfort.

The massaging effect of the jets carries further benefits: as well as reducing oedema (fluid swelling) from around the joints, the pressure stimulates the receptors in the nerve endings and distracts the pain-carrying fibres from passing their pain-inflicting messages to the brain. Pain-killing endorphins are released and the body responds with a sense of well-being.

Whirlpool

WARRANTY

DATE: _____

Pipework/System
The Carron Whirlpool or Spa system you have chosen for your new bathroom has been manufactured in Europe to a very high standard from quality materials and is guaranteed for two years from date of installation. However, should any defect occur within the pipework we guarantee to repair or replace the defective materials free of charge, during the guarantee period, except where there has been negligence caused by misuse or improper installation. This Warranty covers UK mainland only including Northern Ireland.

Whirlpool Pump/Air Blower
The pump installed in your whirlpool system is manufactured in Europe to an exceptionally high standard and is guaranteed for two years from the date of installation. The Air Blower on your Air Spa System is guaranteed for two years from date of installation. We guarantee to repair or replace this pump or air blower free of charge should a defect appear during the guarantee period except where there has been negligence caused by misuse or improper installation. This Warranty covers UK mainland only including Northern Ireland.

The guarantee does not cover any component which in the opinion of the company has been neglected, misused, damaged, cleaned with an abrasive/acidic substance or restricted with mescale or foreign matter. Chrome or Gold finishes shall be covered against defects only for one year.

claim may be made under this guarantee in respect of wear and tear.

company shall not bear any of the cost of removing or making good any panels, tiling or devices which may hinder access to any component part.

Note
If a service engineer is called out and the problem with the system is found to be no fault of the company, the visit will be chargeable at the current rate.

THIS WARRANTY IS VOLUNTARY FROM CARRON BATHROOMS LTD. AND IN ADDITION TO YOUR NORMAL STATUTORY RIGHTS - SHOWROOM DISPLAY BATHS EXCLUDED.

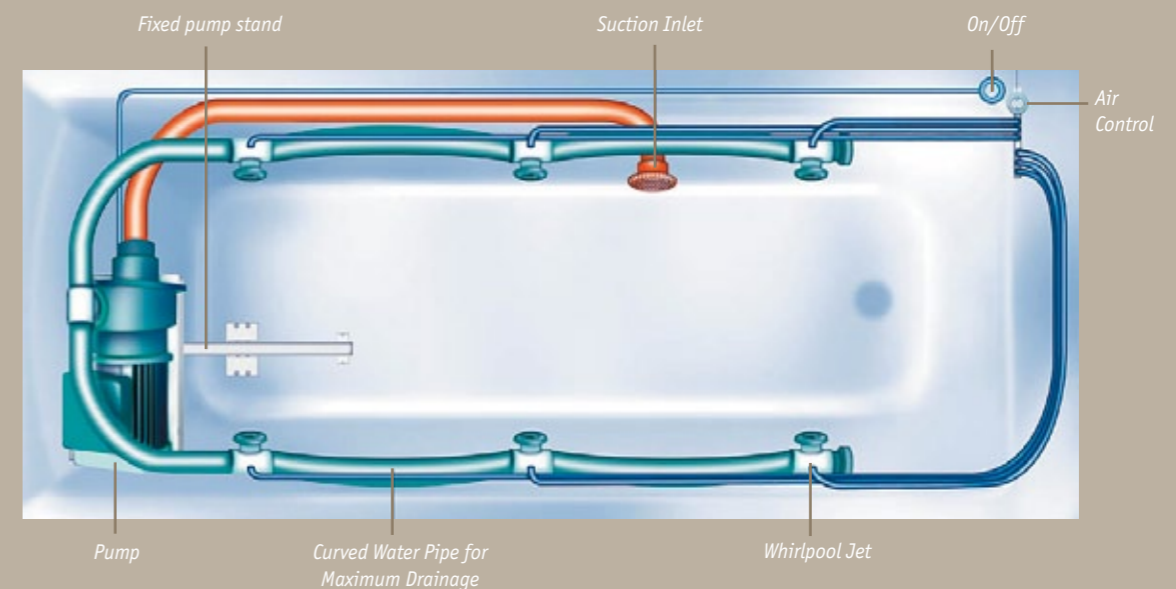

please retain this card for future reference

UK Infirmary reveals that the ancient art of hydrotherapy with the aid of jetted water has several medical benefits:

- It dilates the arteries, increasing blood circulation without increasing heart rate and therefore lowering blood pressure.
- Cardiovascular changes relieve congestive heart failure, hypertension and stress.

- Hymodilation dilutes the blood, reducing inflammation and swelling due to arthritic problems, as well as relieving muscular aches and pains and increasing the tissue repair system.
- Increased diuresis (water and salt loss) helps gout, kidney disorders and cirrhosis.

Technical

Rigid piping, 0.75hp self draining pump, fixed and mounted, pneumatic on/off control, directional whirlpool jets, fitted and fully tested, complete with two-

year warranty. All systems use 13 amp supply with ELCB fitted by a qualified electrician.

Note: because pipes are housed within the vertical of the outside rim of the bath this means that a wooden panel will not fit.

Flush-jet technology

c-lenda
by **MARKON**

The latest innovation in spa baths

Born of 20 years endless pursuit of design excellence, MARKON have developed the new generation of c-lenda spa bath fittings. Superior design, sophisticated style - this worldwide patented system combines modern materials with the look of tomorrow's technology, offering the bather the comfort and style they deserve.

With MARKON's patented c-lenda technology, fittings are mounted flush with the bath wall, creating a smooth continuous surface without any protrusions. Designed to be visually pleasing and extremely comfortable, the c-lenda fittings are easy to clean and will maintain their appealing look for years to come.

Every aspect of c-lenda technology has been designed with the bather in mind. From the smooth, easily adjustable controls, the invigorating jet massage performance through to the super safe suction system, you can be assured you will get the comfort, style, performance and protection you deserve from c-lenda.

c-lenda, "there will be no looking back"

Patented Design Technology

The intelligence of the c-lenda flush jet system lies within the patented mounting flange. Manufactured from high grade stainless steel this unique patented load transfer device ensures the fittings are securely mounted to eliminate cracking and peeling, which prolongs the quality and beauty of your c-lenda flush jet system.

Everything else is a compromise.

Innovative Thinking

MARKON constantly focuses energy on changing needs and have designed and developed technological advancements in water jets for the spa bath (whirlpool) markets. Our philosophy is to lead the world in design and development of new products for these markets through innovation, total quality management and supreme service levels.

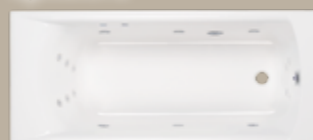

We are committed to designing and developing high quality products and incorporate an extensive research and development strategy to keep us in the forefront of the industry.

Our strength is our ability to control the total process of design, development and manufacture which allows us to maintain the highest product standards with seamless integration.
